PROJECTS

Myntra.com Clone |  |  **(Individual)**

React.js | Redux | Firebase | Razorpay | JSON Server

- Developed a clone of the popular online fashion and lifestyle e-commerce platform Myntra.com.
- Implemented features such as user authentication, with OTP, product catalog, shopping cart, and checkout process.
- Utilized technologies like Redux, Firebase, Razorpay, JSON Server, and Chakra UI.
- Achieved a responsive design to ensure the website is accessible on different devices.

Dash Donation (Clone of Charity Hero) |  |  **(Group)**

React.js | Redux | Node.js | MongoDB | Chakra UI

- Developed a full-stack charity website providing food, medicines, education, and relief for victims of the Ukraine war.
- Implemented user authentication, donation, and payment routes using Node.js and Express.js
- Integrated Razorpay API for seamless payment processing.
- Designed and developed frontend pages including organization and payment pages using React.js and Chakra UI.
